

Name of Project - Jaypee Limestone Mine (A unit of M/s Jaiprakash Associates Limited)
Environmental Clearance letter no: - J-11016/202/2003-IA-II(M) Dated 6th Jan 2005
Period of Compliance report – April,2015 to September, 2015

A. SPECIFIC CONDITIONS

No.	Conditions to be Complied	Status
I	Top soil shall be stacked properly with proper slope at ear marked site(s).	Topsoil is being stacked properly at earmarked site with proper slope. 3984 M ³ top soil was generated during April, 2015 to September, 2015.
II	<p>OB should be stacked at earmarked dumpsite only on temporary basis. Garland drains will be provided around the excavations to prevent storm water from catchment area to come in contact with freshly excavated areas. The drains will be provided all along the toe of the dump to arrest any soil erosion. Loose material slopes will be planted by making contour trenches at 2m intervals to check soil erosion.</p> <p>Plantation should be taken up for soil stabilization along the slopes of the dump. Sedimentation pits should be constructed at the corners of the garland drains. The surface run-off should be desilted through a series of check dams & drains before final disposal.</p>	<p>OB is stacked at earmarked dumpsite. OB generated is accommodated in the dumped yard on temporary basis. Backfilling of mined out area has also been commenced. Garland drains have been provided around the excavation to prevent storm water from catchment area to come in contact with freshly excavated area. Drains are provided at the toe of the dump. Plantation has been done on slopes for stabilization. Check dam have been constructed.</p> <p>Quantity of OB generated - 528476 Cum Area backfill – 4 ha.</p>
III	<p>Peripheral bunds, check dams & siltation ponds of appropriate size should be constructed to arrest silt & sediments flow from the mining operations. The water so collected should be utilized for watering the mine area, roads, green belt development etc. The drains should be regularly desilted & maintained.</p> <p>Garland drain (size, gradient & length) & sump capacity should be designed keeping 50% safety margin over & above the peak sudden rainfall & maximum discharge in the area adjoining the mine site. Sump capacity should also provide adequate retention period to allow proper settling of silt material.</p>	<p>In order to arrest silt and sedimentation flow from the mining area, a check dam/siltation pond was constructed. The water collected was used for sprinkling on the mine haul roads and green belt development. Sump & garland drain has been suitably designed and provided with 50% safety margin over the peak sudden rainfall. Sump capacity with adequate retention period has been provided to allow proper settling of silt material. De-silting of garland drains and sump is being done before rainy season.</p>
IV	Drills should be wet operated or with dust extractors & controlled blasting should be practiced.	Drilling operation is carried out with wet drilling. Controlled blasting is carried out under the supervision of statutory qualified person in day time only. Warning boards are displayed at various major approach roads to aware villagers about the danger zone.
V	Crusher should be operated with high efficiency bag filters, water sprinkling system should be provided to check fugitive emissions from crushing operations, haulage roads, transfer points etc. duly	Crusher is provided with adequate capacity of bag filters. Water sprinkling system has also been provided at crusher, screens & transfer points. Haul roads are kept in moist conditions round the clock by water sprinklers.

VI	Plantation should also be raised along the roads, dump sites etc. This includes a wide green belt along the periphery of the ML area, OB dump & along roadside within the lease area by planting native plant series in consultation with local DFO/ Agriculture Department. At least 2500 plant species /ha should be planted.	Plantation is carried out along the roads, dump sites and on reclaimed area. Till date 191050 Nos. of tree have been planted at mines.
VII	An estimated 51 mill, m ³ of OB that will be generated shall be used to concurrently backfill the 224 ha of mined out area. A progressive Mine Closure Plan shall be implemented reclamation & rehabilitation program of the mined out area shall be done.	The mined out area has been rehabilitated by way of back filling, covering with top soil and afforestation. Some of the area has been rehabilitated by converting the mine pit into a water reservoir. The water reservoir helps in rain water harvesting and water conservation. The reclamation & rehabilitation of the abandoned mine pits have been carried out in line with progressive mine closure plan.
VIII	Mining shall not intersect ground water. Prior approval of the MOEF & CGWA shall be obtained before mining below ground water.	Prior approval will be taken from MoEF and CGWA for intersection of ground water table during mining operation.
IX	Regular monitoring of ground water level & quality should be carried out by establishing a network of existing wells & constructing new peizometers at suitable locations in project area. The frequency of monitoring should be minimum four times a year - January, pre-monsoon (April/May, monsoon (August), post monsoon (November), & winter (January) seasons for ground water level & in May for quality. Data generated from groundwater regime monitoring will be submitted to CGWB, Regional Office on an annual basis.	Regular monitoring of ground water level & quality is being carried out and reports are submitted periodically to Regional office CGWB. Last report submitted for the year 2014-15 on 8/05/2015 vide letter no jrp/ec/cgwb/2015-16.
X	Digital processing of the entire lease area using remote sensing techniques should be done regularly once in 3 years for monitoring land use pattern & report submitted to MOEF & its Regional Office at Bhopal.	Digital processing of the entire lease area using remote sensing techniques is being carried out. Recently digital processing was done by Hydro-Geo survey Consultant Private Limited & report submitted to the MoEF and MPPCB office vides our letter No. JAL/Env/EC/JLSM/2013-14/98 dated 25/01/2014.
XII	A final mine closure plan alongwith details of Corpus Fund should be submitted to Ministry of Environment & Forests 5 years in advance of final mine closure for approval.	It is a running Mine and Progressive Mine closure plan has been approved by IBM, Nagpur vide letter no. 314(3)/2005-MCCM (CZ)/MP-S-24 dated 31/07/2006. Final mine closure plan is not applicable at this stage.
XII	Consent to Operate should be obtained from the SPCB before commencing production.	Consent to operate from MPPCB vide their letter nos.5589 & 5591/ TS/ MPPCB/ Mine / 2005 dated 22.03.2005 and the consent was renewed vide letter nos. AW 22798/Mine/ PCB/ Bhopal dated 24.08.2015 and valid up to 31.12.2016.
XIII	The proponent shall earmark a separate fund of 1% with a minimum of Rs. 50,000/- of the total project cost for eco-development measures including community welfare measures in the project area. The amount shall be deposited by the company in a separate account within three months to be	In the year of 2014-15 (April, 2015 to Sept. 2015) company has spent Rs. 49.36 lacs for eco-development measures including community welfare under Comprehensive Rural Development Programme (CRDP).

<p>maintained by the Madhya Pradesh State Pollution Control Board. The action plan in this regard shall be submitted to the SPCB as well as to MOEF & its Regional Office at Bhopal within three months of issue of this letter. After approval of the action plan by the SPCB, the amount deposited shall be released in two installments to the project authorities based on progress of implementation. The SPCB shall ensure that implementation of the action plan for eco-development measures is completed within two years from date of its approval by SPCB. Further, the interest accrued during this period on the amount deposited by the proponent with the SPCB shall be ploughed back to the same eco-development fund.</p>	
--	--

B. General Conditions

No.	Conditions to be Complied	Status																																																																						
I	No change in technology & scope of working should be made without prior approval of the Ministry of Environment & Forest.	Noted and Agreed																																																																						
II	No change in the calendar plan including excavation, quantum of limestone, waste / OB dumps should be made.	Noted and Agreed																																																																						
III	Four ambient air quality monitoring stations should be established in the core zone as well as buffer zone for SPM, RPM, NO _x & SO ₂ . Location of the ambient air quality stations should be decided on meteorological data, topographical features & environmentally & ecologically sensitive targets & the frequency of monitoring should be undertaken in consultation with State Pollution Control Board.	<p>Four Ambient Air Quality Monitoring Stations are installed at suitable locations in the core zone as well as in buffer zone for PM₁₀, PM_{2.5}, NO_x and SO₂ monitoring in consultation with SPCB. The frequency of monitoring has also been fixed in consultation with the SPCB. Monitoring data are as under.</p> <p>Core Zone: Average Data (April,2015 to September,2015)</p> <table border="1" style="width: 100%; border-collapse: collapse; margin-bottom: 10px;"> <thead> <tr> <th style="text-align: center;">Location</th> <th style="text-align: center;">PM₁₀ (µg/m³)</th> <th style="text-align: center;">PM_{2.5} (µg/m³)</th> <th style="text-align: center;">SO₂ (µg/m³)</th> <th style="text-align: center;">NO_x (µg/m³)</th> <th style="text-align: center;">CO (µg/m³)</th> <th style="text-align: center;">O₃ (µg/m³)</th> </tr> </thead> <tbody> <tr> <td>Near Drilling Site</td> <td style="text-align: center;">56.8</td> <td style="text-align: center;">35.5</td> <td style="text-align: center;">6.6</td> <td style="text-align: center;">13.3</td> <td style="text-align: center;">131.4</td> <td style="text-align: center;">4.3</td> </tr> <tr> <td>Near L/S Loading Site</td> <td style="text-align: center;">52.7</td> <td style="text-align: center;">34.8</td> <td style="text-align: center;">6.8</td> <td style="text-align: center;">12.8</td> <td style="text-align: center;">134.7</td> <td style="text-align: center;">4.1</td> </tr> <tr> <td>Near Haul Road</td> <td style="text-align: center;">55.6</td> <td style="text-align: center;">34.4</td> <td style="text-align: center;">6.9</td> <td style="text-align: center;">13.0</td> <td style="text-align: center;">133.9</td> <td style="text-align: center;">4.3</td> </tr> <tr> <td>Near Water Pump Station</td> <td style="text-align: center;">55.7</td> <td style="text-align: center;">36.6</td> <td style="text-align: center;">7.0</td> <td style="text-align: center;">12.8</td> <td style="text-align: center;">133.3</td> <td style="text-align: center;">4.4</td> </tr> </tbody> </table> <p>Buffer Zone: Average Data (April,2015 to September,2015)</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;">Location</th> <th style="text-align: center;">PM₁₀ (µg/m³)</th> <th style="text-align: center;">PM_{2.5} (µg/m³)</th> <th style="text-align: center;">SO₂ (µg/m³)</th> <th style="text-align: center;">NO_x (µg/m³)</th> <th style="text-align: center;">CO (µg/m³)</th> <th style="text-align: center;">O₃ (µg/m³)</th> </tr> </thead> <tbody> <tr> <td>Near Madheyapur</td> <td style="text-align: center;">44.0</td> <td style="text-align: center;">26.8</td> <td style="text-align: center;">6.8</td> <td style="text-align: center;">13.5</td> <td style="text-align: center;">126.6</td> <td style="text-align: center;">4.4</td> </tr> <tr> <td>Near Bholgarh</td> <td style="text-align: center;">43.8</td> <td style="text-align: center;">25.3</td> <td style="text-align: center;">6.6</td> <td style="text-align: center;">13.3</td> <td style="text-align: center;">124.8</td> <td style="text-align: center;">4.4</td> </tr> <tr> <td>Near Kathar</td> <td style="text-align: center;">44.3</td> <td style="text-align: center;">25.3</td> <td style="text-align: center;">6.7</td> <td style="text-align: center;">13.9</td> <td style="text-align: center;">125.5</td> <td style="text-align: center;">4.4</td> </tr> <tr> <td>Near Naraura</td> <td style="text-align: center;">43.6</td> <td style="text-align: center;">25.2</td> <td style="text-align: center;">6.5</td> <td style="text-align: center;">13.2</td> <td style="text-align: center;">125.3</td> <td style="text-align: center;">4.1</td> </tr> </tbody> </table>	Location	PM ₁₀ (µg/m ³)	PM _{2.5} (µg/m ³)	SO ₂ (µg/m ³)	NO _x (µg/m ³)	CO (µg/m ³)	O ₃ (µg/m ³)	Near Drilling Site	56.8	35.5	6.6	13.3	131.4	4.3	Near L/S Loading Site	52.7	34.8	6.8	12.8	134.7	4.1	Near Haul Road	55.6	34.4	6.9	13.0	133.9	4.3	Near Water Pump Station	55.7	36.6	7.0	12.8	133.3	4.4	Location	PM ₁₀ (µg/m ³)	PM _{2.5} (µg/m ³)	SO ₂ (µg/m ³)	NO _x (µg/m ³)	CO (µg/m ³)	O ₃ (µg/m ³)	Near Madheyapur	44.0	26.8	6.8	13.5	126.6	4.4	Near Bholgarh	43.8	25.3	6.6	13.3	124.8	4.4	Near Kathar	44.3	25.3	6.7	13.9	125.5	4.4	Near Naraura	43.6	25.2	6.5	13.2	125.3	4.1

IV	Data on Environmental Quality should be regularly submitted to the Ministry including its Regional Office at Bhopal & the State Pollution Control Board / Central Pollution Control Board once in six months.	Data on environmental quality has been regularly submitted to the MoEF including its Regional Office at Bhopal, State Pollution Control Board and Central Pollution Control Board, once in six months. Monitored environmental data of last six month have already been submitted vide our letter no. JAL/EC./MoEF/2015-16 date 21.05.2015.																																																																					
V	Adequate measures for control of fugitive emissions should be undertaken such as water spraying arrangements on haul roads, loading & unloading points, & transportation of minerals etc. Fugitive dust emissions from all sourced should be regularly monitored & data recorded properly.	Measures have been taken for control of fugitive emissions, such as water spraying arrangement through tankers for dust suppression on haul roads loading and unloading points and by providing covers on conveyor belts for transportation of minerals. The Fugitive emission from all sources has been regularly monitored and recorded.																																																																					
VI	Adequate measures should be taken for control of noise levels below 85 dBA in the work environment. Workers engaged in blasting & drilling operations, operations of HEMM etc., should be provided with ear plugs / muffs.	Adequate measures have been adopted for control of noise levels and is maintained below 85 dB (A) in the work environment. Workers engaged in blasting and drilling operations, operations of HEMM etc., have been provided with ear plugs/muffs.																																																																					
VII	Industrial wastewater (workshop & wastewater from the mine) should be properly collected, treated so as to conform to the standards prescribed under GSR 422 (E) dated 19 th May 1993 & 31 st December 1993 or as amended from time to time. Oil & grease trap should be installed before discharge of effluents from the workshop.	No wastewater is generated from the mining operation. The waste water generated from Mine workshop is passed through oil & grease separator and settling tank and clean water conform to the standards. The collected water is being used for dust suppression at haul roads. Analysis report is as under: <table border="1" data-bbox="1256 986 2067 1278"> <thead> <tr> <th colspan="9">HALF YEARLY TREATED WATER ANALYSIS REPORT (Auto work-Shop)</th> </tr> <tr> <th colspan="9">PERIOD: (April, 2015 - September, 2015)</th> </tr> <tr> <th rowspan="2">Sr. No</th> <th rowspan="2">Parameters</th> <th rowspan="2">General Standards</th> <th colspan="6">Analysis data (mg/l), except pH</th> </tr> <tr> <th>April</th> <th>May</th> <th>June</th> <th>July</th> <th>August</th> <th>September</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>pH</td> <td>5.5 - 9</td> <td>7.8</td> <td>7.4</td> <td>7.7</td> <td>7.5</td> <td>7.4</td> <td>7.6</td> </tr> <tr> <td>2</td> <td>TSS</td> <td>100</td> <td>65</td> <td>60</td> <td>63</td> <td>67</td> <td>65</td> <td>68</td> </tr> <tr> <td>3</td> <td>Oil & Grease</td> <td>10</td> <td>2.7</td> <td>2.5</td> <td>3.1</td> <td>2.8</td> <td>3.2</td> <td>3.4</td> </tr> <tr> <td>4</td> <td>COD</td> <td>250</td> <td>128</td> <td>114</td> <td>125</td> <td>136</td> <td>132</td> <td>142</td> </tr> </tbody> </table>	HALF YEARLY TREATED WATER ANALYSIS REPORT (Auto work-Shop)									PERIOD: (April, 2015 - September, 2015)									Sr. No	Parameters	General Standards	Analysis data (mg/l), except pH						April	May	June	July	August	September	1	pH	5.5 - 9	7.8	7.4	7.7	7.5	7.4	7.6	2	TSS	100	65	60	63	67	65	68	3	Oil & Grease	10	2.7	2.5	3.1	2.8	3.2	3.4	4	COD	250	128	114	125	136	132	142

IX	The data on environmental quality should be collected & analyzed either through an in-house environmental laboratory established with adequate number & type of pollution monitoring & analysis equipment or got analyzed through an approved laboratory under the Environment (Protection) Rules 1986 in consultation with the State Pollution Control Board.	The monitoring and analysis of environmental parameter are being carried out in-house in well equipped environmental laboratory run under experienced and well trained environment personal.																																																																
X	A separate environmental management cell with suitable qualified personnel should be set under the control of a senior executive who will report directly to the head of the Organization.	A separate environmental management cell with suitable personnel under the control of a senior executive has already been established.																																																																
XI	The funds earmarked for environmental protection measures should be kept in separate account & not diverted for any other purpose. Year-wise expenditure should be reported to Ministry of Environment & Forest.	The expenditure incurred for environmental protection measures form April, 2015 to September, 2015 was aprox. Rs. 34.50 lacs																																																																
XII	The project authorities should inform to the Regional Office located at Bhopal regarding date of financial closures & final approval of the project by the concerned authorities & the date of start of land development work.	Noted. The mine is in operation since 22.03.2005																																																																
XIII	The Regional Office of this Ministry located at Bhopal shall monitor compliance of the stipulated environmental conditions. The project authorities should extend full cooperation to the officer(s) of the Regional Office by furnishing the requisite data/information/monitoring reports.	Noted and Agreed																																																																
XIV	A copy of the clearance, letter should be marked to the concerned Panchayat/local NGO, if any, from whom any suggestion/representation has been received while processing the proposal.	Environment Clearance letter sent to respective Panchayat and receipt taken.																																																																
XV	The State Pollution Control Board should display a copy of the clearance letter at the Regional Office, District Industry Center & the Collector's/Tehsildar's Office for 30 days.	Environment Clearance letter copy sent to respective department and receipt taken.																																																																

XVI	The project authorities should advertise at least in two newspapers widely circulated around the project, one of which shall be in the vernacular language of the locality concerned within 7 days of issuance of the clearance letter informing that the project has been accorded environmental clearance & a copy of the clearance letter is available with the State Pollution Control Board & may also be seen at website of the Ministry of Environment & Forest at http://envfor.nic.in .	EC issuance information was advertised in two local news papers.
XVII	The Ministry or any other component authority may stipulate any further additional condition for environmental protection.	Noted and Agreed
XVIII	Failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance.	Noted and Agreed
XIX	The above conditions will be enforced, inter-alia, under the provision of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act. 1986 & the Public Liability Insurance Act 1991 alongwith their amendments & rules.	Noted and Agreed
