It is pertinent to mention here that our Cement Plant at Baga (Arki) Solan HP is a new establishment and have been commissioned since February'10. Occupational diseases like Pneumoconiosis, Silicosis and Anthracosis takes few months to a year to develop and establish their symptoms under most vulnerable / congenial conditions (i.e. dusty environment) if exposure is prolonged up to life time. It takes many years to these diseases to develop if the conditions are well controlled (i.e. seemingly dust free environment). Any positive results if obtained in regard to above shall be reported to MoEF and any Medical agency engaged with the job of research and analysis.

In regard to above, medical record books, health register and examination reports of the workers are regularly maintained on prescribed format and samples are enclosed herewith as under:
